SamHTX

1. Introduction

SamHTX is designed to revolutionize digital asset management and financial transactions by providing a secure, transparent, and decentralized cryptocurrency solution. Built on cutting-edge blockchain technology, SamHTX aims to bridge the gap between traditional finance and the evolving digital economy.

Key Objectives:

- **Seamless Transactions**: Enable fast, low-cost, and borderless transactions for users and businesses.

- **Financial Inclusion**: Empower individuals and businesses in emerging markets by offering accessible digital financial solutions.

- **Decentralized Economy**: Foster a trustless and transparent ecosystem where users have complete control over their assets.

- **Integration & Utility**: Serve as a multi-purpose digital currency for payments, staking, governance, and smart contract applications.

- **Security & Compliance**: Ensure top-tier security measures and compliance with global regulations to create a safe and scalable ecosystem.

SamHTX envisions becoming a widely adopted digital asset that enhances financial freedom, removes barriers to entry, and fuels the next generation of decentralized applications and services.

2. Token Details

- **Blockchain**: Ethereum (ETH)

- **Token Standard**: ERC-20

- **Total Supply**: 100 Billion (100Bn)

- **Smart Contract Address**: 0x507D83613f04B7AB80261Ac963404f6B31389d67

- **Distribution Plan**:

    o Currently, only a few tokens have been distributed to the core team.

    o **Marketing Allocation**: 500,000 Tokens

    o **Referral Bonus Pool**: Up to 100,000 Tokens
